VIO 202 Reflection

VIO 102 showed me that I knew little to none about design and the theory surrounding it and that I had a lot to catch up on. At the beginning of first year I did not enjoy VIO because I thought that I would never learn how to do anything well enough, but luckily, I proved myself wrong. At the beginning of second year I was under the impression that I wouldn't be able to do anything once again because it was all digital, and you can clearly see that in my theme 1 project, but luckily there were 3 more themes to practice and perfect after that. When Theme 2 came around I was a lot more confident in my abilities and I feel like you can see that in my theme 2 project. The theme 4/practical exam was by far my favorite theme because it allowed me to reflect and perfect what I've learnt through the year and I could see my own progression through the year which gave me a confidence boost. VIO 102 and VIO 202 taught me a lot about myself and allowing me to discover abilities that I never knew I had. Most of the lecturers were always there when we needed them, and they always provided us with material to help us. I will always be thankful for VIO because I know that I will always use the knowledge that I got, whether it be in my final year IMY project or in the workplace one day. Thank you VIO.
